

Keerthihan Murugathas

Software Engineering Intern | Full-Stack Web Developer

+94 778809012 | [Gmail](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated and proactive third-year BSc (Hons) Information Technology undergraduate with hands-on experience in full-stack web development, backend engineering, authentication systems, real-time applications, and mobile app development. Skilled in Java, JavaScript, React, Spring Boot, Node.js, Express.js, MongoDB, MySQL, and Kotlin. Experienced in building scalable applications using MERN, Spring Boot, REST APIs, OAuth 2.0, JWT, and role-based access control. Strong in problem-solving, teamwork, and adapting quickly to new tools and technologies.

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT) | Expected Graduation: 2027 | Current: Year 3, Semester 2

GPA: 3.18 / 4.00

EXPERIENCE

Software Engineer Intern

HABB | Sep 2025 – Present

- Contributing to software development tasks in a professional engineering environment.
- Supporting application development, debugging, and feature implementation across ongoing projects.
- Gaining practical experience in teamwork, code collaboration, and Agile software engineering workflows.

PROJECTS

University Market Place | MERN + Machine Learning + Real-Time Chat

https://github.com/Thewni03/University_Market_Place.git

- Built a full-stack MERN-based University Market Place platform for students to list, discover, and book services, including modules for service management, reviews, campus forum, feed, and payment records.
- Integrated a Machine Learning microservice using FastAPI, Pandas, Joblib, and XGBoost to generate service-related predictions from marketplace data (ratings, reviews, pricing, category, location), achieving 0.98 model accuracy.
- Developed a real-time chat system using Socket.IO and Zustand, supporting live messaging, unread message tracking, online user presence, and image sharing via Cloudinary.
- Implemented secure backend using Node.js, Express.js, MongoDB, Mongoose, and JWT, along with in-app, email, and push notifications, user verification, and a custom trust score mechanism.

Skills: MERN Stack, FastAPI, XGBoost, Socket.IO, Zustand, JWT, MongoDB, Cloudinary, Machine Learning

Smart Campus Operations Hub | Spring Boot + React + MongoDB

<https://github.com/Thewni03/Smart-Campus-Operations-Hub.git>

- Built Google OAuth 2.0 authentication and role-based authorization for a Smart Campus web application using Spring Boot and React.
- Developed a notification module for booking updates, ticket progress, and comment alerts.
- Created an admin dashboard and contributed to booking and maintenance management workflows in a full-stack campus operations platform.

Skills: Spring Boot, React, REST API, OAuth 2.0, RBAC, Google Sign-In, Notifications, Admin Dashboard, MongoDB

Hospital Management System | MERN Stack

<https://github.com/Keerthihan/Hospital-management-inventory.git>

- Built a digital hospital management platform automating patient appointment booking, doctor scheduling, and inventory management.
- Reduced manual work by digitizing workflows; implemented scheduling to reduce conflicts and improve resource utilization.
- Developed inventory tracking with stock visibility and low-stock management support.

Tech: React (Vite), Node.js, Express.js, MongoDB

Mobile Finance Tracker App | Kotlin + Android Studio

<https://github.com/Keerthihan/FinanceTracker.git>

- Built a mobile finance tracking application for managing income, expenses, budgets, and personal spending records.
- Implemented data persistence using SharedPreferences and internal storage with structured modules for transaction and budget monitoring.
- Designed Android user interfaces using Kotlin and XML with a focus on usability and local data management. Tech: Kotlin, Android Studio, XML, SharedPreferences

Pharmacy Management System | Full-Stack Java

- Created a CRUD-enabled web application for pharmacy inventory management, including product management, stock tracking, and sales records.
- Implemented authentication and a responsive interface for admin and staff users.

Tech: Java, Servlets, JSP, MySQL, HTML, CSS

Antique Shop E-Commerce Website | PHP + MySQL

- Developed a responsive e-commerce website for an antique shop with admin panels, product listings, and customer account features.
- Implemented secure admin login, product browsing, search, and order-related functionality with a user-friendly web interface. Tech: PHP, MySQL, HTML5, CSS3, JavaScript

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C, C++, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, NestJS, Spring Boot, Tailwind CSS, FastAPI, Zustand, Socket.IO

Databases & Backend Services: MongoDB, MySQL, Supabase

Mobile Development: Kotlin, Android Studio, XML

Tools & Platforms: Git, GitHub, VS Code, Vite, R Studio, Cloudinary

Concepts: REST APIs, OAuth 2.0, JWT Authentication, RBAC, CRUD Operations, Real-Time Systems, AI/ML

Fundamentals

CERTIFICATIONS

- [Professional Certificate in Artificial Intelligence – Informatics Institute of Technology](#)

- [Supervised Machine Learning: Regression and Classification](#)
